2. Demonstrated need - programs/projects that use research and evaluation to support clients with complex needs and multiple barriers. The program/project meets a unique need that is not being met elsewhere or shows that existing services are insufficient to meet the local demand.
3. Coordinated service delivery - programs that are working with others to ensure there is coordination across services.
4. System navigation - programs that support clients to access multiple services and to access existing supports.
5. Collective approaches – initiatives that have multiple partners and are working to address identified community issues.
6. Focused on serving targeted populations (see Targeted Populations document)
7. Barrier removal – programs/projects that have identified barriers for hard to serve clients and are working to remove these barriers; and,
8. Neighbourhood programs - programs that are in, or close to communities where the clients reside.
9. Program effectiveness with defined outcomes
10. Customized - to ensure services are delivered in a culturally safe and affirming manner; and include those most vulnerable
